Boy's View of Policemen,

A boy's view of policemen is thus quaintly expressed in the examination papers of the Albert Street school, Balwell, Nottingham, England:

"One of our well-known men in the large towns is the policeman; he is a very large man, and looks very smart

EMPHATICALLY DENIES CHARGE

Had Fine Letters From Sherman and Gardner-Mulhall Gets Excited After Relating Plot to Bribe Gompers That Did Not Succeed

Washington, July 19 .- S. Wood Mc-Clave, Republican candidate for congress in a special election to be held in the Sixth New Jersey district next Tuesday, tonight told the senate lobby investigatnig committee that Martin M. Mulhall had perjured himself in his testimony before the committee. McClave denied that Mulhall had rais ed or spent money for him, had man-aged his campaign or had been his close companion and associate during his fight against William Hughes for the Sixth district nomination in 1910.

Mulhall, the witiess swore, came unknown to him in his office in New York City, in 1910, introduced himself and said he wanted to help him.

"It looks as if you were going to get the nomination," he quoted Mulhall as saying, "and I wanted to know how you stood on public questions." McClave said he replied that he stood for protection and fair dealing to labor, and that Mulhall responded, 'our organization stands for the same thing and wants to help you."

He added that Mulhall insisted upon hiring two rooms in Patterson as headquarters, but that he visited them only a few times and then saw only a few men, Mulhall had letters from Vice-President Sherman, Congressman Gardner and others, the witness said. "That was my first experience," he added, "and I supposed that a man endorsed by such men must be all

right." The New Jersey man had been held up to the committee by Mulhall yesterday as one whose meal checks and other expenses Mulhall had continuously paid and for whom Mulhall raised and spent more than \$3,500. This, McClave said, was wholly without truth. McClave said he could obtain no aid from the national committee and when Mulhall came as the representative of the National Association of Manufacturers he said he was willing to accept their assistance.

"What was the National association to get in return for the money It spent," asked Senator Walsh.

"It was going to get a representative in the American congress who was in favor of protection to American industries," replied McClave.

SAILORS "CLEAN UP" SEATTLE

Storm Town and Wreck Offices of I W. W. and Socialists.

Seattle, Wash., July 19 .- A party of marines and sailors from the reserve fleet, most of the sailors wearing the bands of the cruisers Colorado and California, started tonight to "clean up the town" as they expressed it, by attacking Socialist and Industrial Workers of the World headquarters.

A second party of the men from the Pacific reserve fleet attacked the Industrial Workers' headquarters on Washington street, in the southern part of the city. The contents of the building were carried to the street and a boffire made of them.

A provost guard of 59 men from the fleet was hurried in cutters to arrest all the men ashore,

Secretary of the Navy Daniels was di ing on the cruiser West Virginia, the guest of Admiral Reynolds, when the rioting began,

About a dozen sailors, all young, were in the first wrecking party to get under way. They were aided by several members of the Washington naval militia and by a hundred young civilians, who made most of the noise. Waving United States flags, the storming party swooped down on the cart news stand of Milard Price, a Socialist orator at the intersection of Fourth avenue and Weslake boulevard, the busiest night corner of the city. The cart was broken to splinters in a moment and the big stock of Socialist papers and magazines torn, tossed into

the street and jumped upon. The mob then rushed to a store room occupied until recently by the Industrial Workers of the World, at Fifth avenue, near Stewart. The wreckers found the place deserted, the tenants having moved. They then proceeded to the Socialist headquarters on Fifth avenue, near Stewart, smashed in the plate glass front and nailed American flags on the front of the building.

URGES ANOTHER 'HOPPER FIGHT Entomologist Says Half Are Dead in Ford County.

Dodge City, Kan., July 19 .- P. W. Classen, state entomologist, believes that over fifty per cent of the grasshoppers in Ford county have been killed by poison put out. He drove over the county today and reports the destruction of millions of hoppers. He advises another "poison day" for the pests and believes another application of the Paris green would rid the county of hoppers for several years.

Foreman of Jury Had Claimed They Had One Mind, But Losing Lawyer Wanted to Be Shown.

Counsel for the prisoner looked hopefully at the faces of the jurors as they filed into their seats, and listened hopefully as the foreman announced that they had agreed. His client had enjoyed ample provocation for the assault upon the person of Tobias Jones; but the jurors were uniformly Tobias friends and not unbiased.

"The jury is all of one mind, your honor," the foreman said. "We find the prisoner guilty."

"You hear the verdict, counsel," remarked the judge. "The jury is all of one mind. Have you anything to ask of the court before sentence is pronounced?"

"Yes, your honor," replied counsel, still hopefully; "for the purposes of the appeal which my client will take, it would be of material assistance to learn which one of the twelve men who have reached this verdict is possessed of the one mind you are so careful to mention."-New York Evening

HAD SOME WAY TO TRAVEL

Thirsty Man Had Not Thought of Possibilities When He Made Contract With Guide.

After North Carolina voted to be a dry state its citizens became very suspicious of strangers.

One day a commercial traveler went up to an old negro in a little town in the eastern part of the state and said to him:

"Say, untie, if you will lead me to some place where I can get a drink I'll give you two dollars."

The old darkey looked him carefully over, accepted the two plunks, and "All right, boss, just foller me." He led the thirsty one through the town, on through the suburbs, into the country, and then started due west. After they had traversed about five miles in silence and still nothing in

sight, the man asked: Look here, Mose! Where are we going after this drink?"

"We's gwine over into Kentucky, boss; we can't get nuthin' in dis state. -Judge

When Ex-President Taft Was Married. It was formerly a pleasant custom of society reporters to indulge in predictions as to the glorious future of the happy pair. A journalistic prophet of the Cincinnati Commercial Gazette, in writing of the wedding of Miss Helen L. Herron, daughter of John W. Herron to William Howard Taft, which occurred twenty-seven years ago, had this to say:

"William H, Taft is one of the young men of the city who may be depended upon in public affairs. He is one of the highest standing of the graduates of Yale, and his original powers, perfect integrity and courage and correct instincts, as well as thorough information, have made him useful, won for him the friendships and enmittes most complimentary, and opened for him a career that has the highest promise of great distinction."

The remarkable success which has attended the sale of Coca-Cola has been explained in many different ways. Some have attributed it to "good advertis-ing;" others to "efficient management," others, to its "delicious flavor" and still others to the fact that it was the first in the field of "trade-marked" soft drinks.

In this connection, the opinion of a manufacturing chemist who has analyzed Coca-Cola and studied its history for many years, will prove interesting. He attributes the popularity of the drink in large part to its quality of refreshing both mind and body without pro-ducing any subsequent depression. He points out the fact that the chemical composition of Coca-Cola is practically identical with that of coffee and tea (with sugar added) the only material difference being the absence of tannic acid from Coca-Cola. He points to the laboratory experiments of Dr. Hollingworth of Columbia University and of Dr. H. C. Wood, Jr. of Philadelphia which prove conclusively that the caffeine-containing beverages (coffee, tea, Coca-Cola, etc.) refleve mental and muscular fatigue by rendering the nerves and muscles more responsive to the will, thus diminishing the resistance produced by fatigue. These experiments also demonstrate the fact that the caffeine group of beverages differ from the stimulants in that the use of the latter is followed by a period of depression which calls for more stimula-tion, thus resulting in the formation of a "habit."—Adv.
